Role in desired project	technology development : development of new air sampling methodologies and air dispersion models	research : application of VOC analysis to several fields: air quality, odour episodes, materials' emissions, exhaled air, natural emissions	training : possibility of training other participants of the project in our area of expertise
	dissemination : close collaboration with citizens in aspects of enhancing air quality	demonstration :	other :
Topic/s in which I am interested	-ENV2012.6.5-4 Integrated assessment of air pollution supporting the revision of EU air quality legislation - FP7-ENV-2012-one-stage -Air quality, VOC evaluation, numerical modelling of air pollution, VOC emissions in building and automotive materials, applications of VOC analysis to other fields		
Expertise offered and what I would like to do	-Development and validation of air sampling methodologies - Air quality evaluation and odour episodes characterization - Application of numerical simulation techniques to territorial planning - Evaluation of indoor air quality in cases of sick building syndrome (SBS) - Materials' emission evaluation in the automobile industry - Characterization of natural emissions of VOC - Exhaled air analysis - High air quality bubbles
